

BEYOND 5

A CAMPAIGN BY WORLD VISION

Prayer is the ultimate form of advocacy. Join us in praying for these five areas that affect under-5 mortality:

PRAY

Nutrition & Hunger

Hunger and malnutrition are responsible for nearly half of all deaths of children under 5—that's more than 3 million children a year. Getting enough nutritious food in the first 1,000 days of life—from conception to age 2—is critical to lifelong health. Ask God to bring hungry families the emergency food they need today, and the tools they require to put food on their own tables tomorrow.

» *Lord, You know our physical needs. In the Gospels, You fed thousands because You knew they couldn't get food on their own. Please help hungry families today get the nutrition they need to survive and thrive.*

Water, Sanitation & Hygiene

In developing countries, a lack of safe drinking water and improved sanitation accounts for four in five child illnesses, claiming more than 4,000 lives every day. Thank God that increased access to clean water and sanitation is improving child health and well-being, and ask Him to bless the work of all those involved in these life-saving efforts.

» *Lord, we rejoice in the millions of lives saved through the work of organizations such as World Vision. Please continue to equip organizations and developing countries with the funding, workers, and help they need to bring clean water, improved sanitation, and hygiene education to children and families.*

Preventable Disease

Children in the developing world are eight times more likely to die of preventable diseases such as malaria, diarrhea, and pneumonia than those in developed countries. Thank God that access to resources like insecticide-treated bed nets and critical medicines is reducing death rates, and ask Him to protect and heal those who are still vulnerable.

» *Lord, lift the spirits of all who devote themselves to fighting preventable disease, and help their work to save even more lives. Help those who are ill to make a full recovery.*

Healthy Moms & Babies

A woman dies every minute from complications due to pregnancy or childbirth. In developing countries, an expectant mother's risk of death is 1 in 150, compared to 1 in 3,800 in developed countries. Ask God to protect pregnant mothers and their babies.

» *Lord, Psalm 139 says that You knit us together in our mothers' wombs. Be with pregnant women everywhere as they prepare for birth. Give them safe deliveries and healthy babies.*

Local Advocacy

Funding for global health programs has helped save millions of lives and reduced the toll of disease over the past three decades. Ask God to bring unity and courage to advocates across the globe, and pray that the world's nations will honor their financial commitments to care for the most vulnerable children.

» *Lord, You know every child by name and care about them deeply. Please strengthen their advocates and guide the nations around the world to continue to care for Your little ones by investing in the health of all children.*

Five is not a child's lifetime.
